

One dose  
is all you need

## Give your pigs a head start

**Uniferon<sup>®</sup> 200** is a ready-to-use injectable iron supplement for baby pigs that prevents iron deficiency anemia, boosts growth and improves health.

Just one injection of **Uniferon<sup>®</sup> 200** is enough to give your piglets all the iron they need to stay healthy during the critical pre-weaning period.

- Proven results
- Faster growth and weight gain
- Higher yields and profits

**Uniferon<sup>®</sup> 200** is the only 200 mg/mL veterinary iron supplement that is approved by the US Food and Drug Administration (FDA).

Quality iron for your pigs

Uniferon<sup>®</sup> is a registered trademark of Pharmacosmos A/S – leading specialists in iron therapy.
