

## Uniferon Best Practice Recommendation

### Scientific platform

On-time deployment of high calibre knowledge is everything in a competitive environment. Pharmacosmos, recognized as global leader in iron therapy and the originator and manufacturer of Uniferon, is committed to winning with you. This means that Pharmacosmos is dedicated to stay at the very forefront of swine industry developments and knowledge. While it obviously is Pharmacosmos' business to provide swine producers with iron, Pharmacosmos also aspire to meet what seems to be a significant, unmet demand for best practice anaemia care recommendations.

#### The Iron Expert Board:

Pharmacosmos has established the Iron Expert Board with a dedicated panel group consisting of international Key Opinion Leaders, representing some of the best minds in the field of swine health and iron supplementation.

#### Mission of the Iron Expert Board:

The mission of the Iron Expert Board (IEB) is to maintain an up-to-date platform of scientific knowledge relevant to best practice anaemia care, as well as to be a valuable resource for swine producers and veterinary clinicians in a continued effort to provide best in class injectable iron supplementation with Uniferon worldwide.

Thus, the goal of the IEB is:

- To ensure adequate iron supplementation for all piglets – avoiding the "iron gap"
- To widen the understanding of anaemia and the relation between anaemia and growth in particular
- To avoid inappropriate use of iron and "iron overload"
- To make up-to-date recommendations for iron supplementation in order to prevent anaemia

Sincerely  
The Uniferon Team

#### Members of the Iron Expert Board:

Professor Jens Peter Nielsen, University of Copenhagen, Denmark - Chairman

Professor Tore Framstad, Norwegian School of Veterinary Science, Norway

DVM Thomas G. Gillespie. Diplomat, ABVP, Rensselaer Swine Services, USA

Professor Robert Friendship, Ontario Veterinary College, University of Guelph, Canada

Senior Project Manager Erika Busch, Pig Research Centre, Danish Agriculture and Food Council, Denmark
